

Premium Grade Vinyl Rolls

For use with our standard resin ribbon range. Length: 25 metres.

This is our most popular material, as it covers the majority of day-to-day requirements for signs and labels.

Lighthouse vinyl is suitable for indoor and outdoor use. Externally, it is not affected by wind, rain, snow etc. Over time, exposure to the sun's UV light (ultraviolet) can affect the pigment in the material. So if you place a sign in a position where it is exposed to direct sunlight, after a period of 4-5 years, there may be a level of 'fading'. By this, we do not mean that the colour in the vinyl will have disappeared, but it will not be exactly the same shade as it was originally.

Once applied, our vinyl can operate in temperatures between -40°C to +70°C.

It is available in an array of vibrant colours, hence we are able to produce a comprehensive range of options to cover legislative requirements for Health and Safety, Pipe Marking, etc, for any market in the world. It is also usually possible for us to match corporate colours without the expense of large minimum order quantities.

Ultrabond

For use with our standard resin ribbon range. Length: 25 metres.

If you need the ultimate combination of adhesive strength and longevity, Lighthouse Ultrabond® is the material for you.

This material has a 7 year minimum outdoor durability, coupled with a great temperature tolerance range of -30°C to +80°C. Capable of adhering to even the most difficult surfaces, the high grab adhesive gives a fantastic initial tack and a strong ultimate bond; all in all making it perfect for product marking and industrial applications.

Speciality Materials

For use with our standard resin ribbon range.

CJ1304
Reflective Silver

These are suitable for indoor and outdoor applications and reflect light back, making them highly visible. They are used for warning, traffic and information signs, as well as chevrons, particularly on industrial sites. Vehicle number plates are also popular.

94.50 €

CJ1404
Reflective Yellow

Length: 10 metres.

100mm Wide

CJ1504
Photoluminescent

This is an indoor material that soaks up light and will then emit a green glow for many hours if there is a lighting failure. It is ideal for producing signs and labels showing emergency call points, safe exit routes and stairways (including the edges of steps).

125.00 €

Length: 10 metres.

100mm Wide

CJ0802DES
Silver / Grey Destructible

This is a security product and removal of labels made from this material is extremely difficult. The face has an 'egg-shell' construction, which means that when removal is attempted the label will fragment into tiny pieces. Applications include asset and security labels such as 'Property of...' labels, etc.

White Paper Die Cut Labels

For use with our black wax ribbon.

Matt white, woodfree self-adhesive paper die cut labels. The permanent acrylic adhesive enables trouble-free performance and good adhesion on variety of surfaces and also at low temperatures.

Ideal for use labelling packaging, boxes, product identification, and other everyday applications and is compliant to FDA 175.105. The adhesive can be used in direct contact with dry, non-fatty foodstuffs.

Once applied, our paper labels can operate in temperatures between -20°C to +80°C.

Available as standard in two sizes below, we can also accommodate bespoke sizes upon request.
