CJ-200C

Premium Grade Vinyl Rolls

• All CJ-200C materials are 230mm wide

This is our most popular material, as it covers the majority of day-to-day requirements for signs and labels.

Lighthouse vinyl is suitable for indoor and outdoor use. Externally, it is not affected by wind, rain, snow etc. Over time, exposure to the sun's UV light (ultra violet) can affect the pigment in the material. So if you place a sign in a position where it is exposed to direct sunlight, after a period of 4-5 years, there may be a level of 'fading'. By this, we do not mean that the colour in the vinyl will have disappeared, but it will not be exactly the same shade as it was originally.

Once applied, our vinyl can operate in temperatures between -40°C to +70°C.

It is available in a vast array of vibrant colours, hence we are able to produce a comprehensive range of options to cover legislative requirements for Health and Safety, Pipe Marking, COSHH, WRAP etc, for any market in the world. It is also usually possible for us to match corporate colours without the expense of large minimum order quantities.

To recap the basic properties of Lighthouse vinyl:

- Highly durable, so suitable for indoor and outdoor use
- Perfect for general signage and labelling requirements
- Huge range of colours
- High quality adhesive
- Excellent temperature tolerance

Ultrabond

If you need the ultimate combination of adhesive strength and longevity, Lighthouse Ultrabond® is the material for you.

This material has a 7 year minimum outdoor durability, coupled with a great temperature tolerance range of -30°C to +80°C. Capable of adhering to even the most difficult surfaces, the high grab adhesive gives a fantastic initial tack and a strong ultimate bond; all in all making it perfect for product marking and industrial applications.

Description	Part Number	Price (£)	Part Number	Price (£)
 White Ultrabond	CMUB01	£124.50	CMUB01-30	£336.15
 Yellow Ultrabond	CMUB02	£124.50	CMUB02-30	£336.15

UltraBond®

Outdoor Durable Resin Ribbons

- **Width 250mm, Length 150m.**

Our range of Premium Ribbons are UV stable for 4-5 years, as well as being highly scratch, rub and oil resistant. All ribbons are compatible with our Premium Grade Vinyls, Ultrabond and Photoluminescent.

Description	Part Number	Price (£)	Description	Part Number	Price (£)
 Black	CJ200R40	£95.00	 Red	CJ200R42	£95.00
 UL Black* (for 3M polyester)	CJ200SR40	£95.00	 Blue	CJ200R43	£95.00
 White	CJ200R41	£95.00	 Green	CJ200R44	£95.00

*This black ribbon is UL Approved and is for use on our 3M polyester materials only.

Speciality Materials

Photoluminescent: This is an indoor material that soaks up light and will then emit a green glow for many hours in the event of a lighting failure. It is ideal for producing signs and labels showing emergency call points, safe exit routes and stairways.

It is particularly popular for industrial areas, manufacturing and the off-shore industry. It is also being used in the office environment and public buildings, largely driven by new legislation.

Brushed Gold and Silver: These are essentially 'decorative' materials, designed for applications such as corporate door/nameplates, architectural signage, awards, trophy plates, etc. Not suitable for long-term external use as the colour will fade in 1-2 years when exposed to direct sunlight.

Polyester: This type of material has specific properties that make it suitable for certain applications. It is highly durable and extremely 'dimensionally stable'. Therefore it is ideal for manufacturers' product labels because it will not shrink and expose adhesive edges that can attract dust/dirt and become unsightly or unhygienic. It also has the added benefit of being a UL Approved 3M material.

The operating temperature for this material is -40°C to +149°C. As a result, it can be used for labelling equipment or components that operate at higher temperatures, such as light fittings, motors, valves, batteries etc.

Description	Part Number	Price (£)	Part Number	Price (£)
 Photoluminescent	CM5024	£137.50	CM5024-30	£371.25
 Brushed Gold	CM5029	£119.00	CM5029-30	£321.30
 Brushed Silver	CM5030	£119.00	CM5030-30	£321.30
 3M Silver/Grey Polyester	CM5031	£42.50	CM5031-30	£114.75
 3M White Polyester	CM5032	£42.50	CM5032-30	£114.75

- **For cutting only**

Etched-glass Effect: This material is designed for cutting only. It is predominantly used for producing shapes, graphics and logos to apply to glass doors, panels and partitions. There is a legal requirement to ensure such areas of glass can be seen, so adding corporate logos is a popular way of complying with legislation, whilst also promoting the corporate look.

PVF Overlaminates: This material is designed for cutting only. This outdoor durable material has excellent resistance to weathering and a wide variety of chemicals, solvents and staining agents. It has been designed to dramatically reduce the effect of discolouration/fading caused by UV light. It is intended for the lamination of long-term, outdoor applications such as safety signs, operational decals, vehicle graphics, aircraft decals, etc.

Description	Part Number	Price (£)	Part Number	Price (£)
 Etched Glass Effect	CM5094	£32.00	CM5094-30	£153.60
 PVF Overlaminates	CM5026	£110.00	CM5026-30	£299.00

Vinyl Die Cut Labels (A4/A5)
