Premium Grade Vinyl Rolls

• **Continuous vinyl rolls** • (Width varies as below. Length 25m.)

This is our most popular material, as it covers the majority of day-to-day requirements for signs.

Lighthouse vinyl is suitable for indoor and outdoor use. Externally, it is not affected by wind, rain, snow etc. Over time, exposure to the sun's UV light (ultra violet) can affect the pigment in the material. So if you place a sign in a position where it is exposed to direct sunlight, after a period of 4-5 years, there may be a level of 'fading'. By this, we do not mean that the colour in the vinyl will have disappeared, but it will not be exactly the same shade as it was originally.

Once applied, our vinyl can operate in temperatures between -40°C to +70°C.

It is available in a vast array of vibrant colours, hence we are able to produce a comprehensive range of options to cover legislative requirements for Health and Safety, Pipe Marking, COSHH etc, for any market in the world. It is also usually possible for us to match corporate colours without the expense of large minimum order quantities.

Speciality Materials

• Continuous vinyl rolls

Here is an introduction to the speciality materials in our range:

Tamper Destructible: This is a security product and removal of labels made from this material is extremely difficult. The face has an 'egg-shell' construction, which means that when removal is attempted the label will fragment into tiny pieces. Applications include asset and security labels such as 'Property of...' labels, etc.

Reflective Silver and Yellow: These are suitable for indoor and outdoor applications and reflect light back, making them highly visible. They are used for warning, traffic and information signs, as well as chevrons, particularly on industrial sites. Vehicle number plates are also popular.

Photoluminescent: This is an indoor material that soaks up light and will then emit a green glow for many hours if there is a lighting failure. It is ideal for producing signs and labels showing emergency call points, safe exit routes and stairways (including the edges of steps).

It is particularly popular for industrial areas, manufacturing and the off-shore industry. It is also being used more widely in the office environment and public buildings, largely driven by new legislation.

(Width 100mm. Length 10m.)

Description	Part Number	Price (£)
 Reflective Silver	CJ1304	£46.50
 Reflective Yellow	CJ1404	£46.50
 Photoluminescent	CJ1504	£71.50

(Width 50mm. Length 25m.)

 Silver/Grey Tamper Destructible	CJ0802DES *	£69.95

Pre-Printed Die Cuts

• For producing multi-colour printed labels

Description	Part Number	Price (£)
 Prohibition Circles (100mm Diameter) (233 per roll)	CJCW33 *	£82.60

* Products marked with an asterisk are made to order. Minimum order quantity 6 rolls and multiples thereof.

We also produce blank and pre-printed die cut labels and continuous rolls in vinyl, polyester, polypropylene and paper. Please call us for details.

Durable Resin Ribbons

• For use with our complete range of vinyls • (Width 110mm. Length 91m.)

Our range of premium ribbons offer vibrant colour print on to our range of vinyls. Like our vinyl, they are UV stable for 4-5 years, as well as being highly scratch, rub and oil resistant.
