

create your own signs wherever and whenever you need them

with so many applications, you'll be left wondering what it can't do!

CM-200

Lighthouse
(UK) Ltd

Complete CM-200 System

Including Dedicated Microsoft Certified Software, Printer Cable, Weeding Tool and Squeegee.

only
£995

(Excluding VAT)

Sourcing appropriate signs can often be time consuming and costly, especially where only small quantities, specifically worded, or exact sized outputs are required. This is where the CM-200 allows you to effect huge cost savings and operational improvements, by producing exactly what you want, when you want it... 24 hours a day!

Enjoy instant access to signage 24/7, 365 days a year

The Lighthouse CM-200 is a unique, compact, easy-to-use desktop sign maker.

With a footprint of only 380mm x 200mm, it is smaller than most ink-jet printers, so fits easily into any office environment.

You can produce signs to A5, A4, A3, A2 and even bigger, with individual text and graphics up to 920mm high using the automatic tiling. Signs can be used anywhere, inside or out, for safety signs, warnings, information, directional, facilities and more.

80% cost savings*

The CM-200 doesn't just cut signs; it cuts costs, time and effort too. No more requisitions, no more rifling through catalogues and no more waiting for deliveries. The CM-200 gives you instant access to personalised signage without paying a premium.

*Typical savings can stack up to a massive 80% compared to bought-in customised signs, so imagine the operational improvements and cost reductions you could make with the CM-200 at your fingertips.

- Instant access to professional signage
- Huge library of templates
- Versatile, dedicated, Microsoft Certified software
- Whisper quiet, clean technology
- Extensive consumables range

Lighthouse systems achieve 3 major benefits, enabling customers to:

Save Time

Save Money

Improve Processes

Consumables

Our innovative Microsoft Certified software comes complete with a comprehensive clip art gallery containing more than 2,200 symbols, so all health and safety, facilities, architectural and information signage requirements are taken care of. Company logos and other clip art images can easily be imported to add extra flexibility.

You can cut hundreds of different shapes using the symbols in the gallery, or you can import any shape you require using wmf (Windows Metafile).

Lighthouse supplies a comprehensive list of ancillary items, from signposts to full architectural systems, thus ensuring your signs always look professional.

Signs are made using whisper quiet, vinyl cutting technology and can be applied directly to rigid Foamex board (see separate price list for details), glass, doors, control panels, chemical vessels, vehicles, banners... the list is endless!

Our consumables have recyclable cardboard cores and packaging, making them both environmentally friendly and cost effective.

In addition to our standard vinyl colour range, special colours and substrates are available on request (see separate price list for details). All with low minimum order quantities and no price premium!

This is another unique service offered by Lighthouse, making our CM-200 the most versatile and cost effective system on the market.

All printing materials are manufactured by Lighthouse (UK) Ltd – an ISO 9001 & ISO 14001 Registered Company.

How can we help you get the most from your CM-200?

- we offer on-site training and support
- support and advice by phone, fax and email
- updates, technical data, new clip art and the latest drivers, which can be downloaded from our website

Lighthouse
(UK) Ltd

Here at Lighthouse (UK) Ltd, we manufacture to the highest quality and ethical standards. Having achieved and maintained both ISO 9001 & ISO 14001 certification, we pay particular attention to the impact of our production processes and products on the environment.

All our consumable products utilise cores and packaging which are both recycled and recyclable, thus reducing waste, disposal issues and cost.

Lighthouse products are RoHS, WEEE and REACH compliant and CE Certified.
