CPM-100H

Multi-Colour Desktop Sign & Label System

 save time  save money  improve processes

Sourcing good quality, specifically worded or bespoke cut product labels, can often be time consuming and costly. This is where the CPM-100H allows you to effect huge cost savings and operational improvements, by producing exactly what you want, when you want it... 24 hours a day!

Why purchase a CPM-100H?

The CPM-100H model, has a superior, hi-definition, 400dpi print head, bringing stunningly crisp edge-line definition to text and graphics, even when printing very small output. This opens up a range of applications, especially when combined with certain materials. These include:

- Product Labels
- Cryogenic, Laboratory and Test-tube Labels
- Warranty Labels
- Security Labels (Tamper-evident & Tamper-void)
- PCB Labels (Printed Circuit Board)
- Barcode Labels
- Schematics and Technical Graphics

In addition, this model covers all the established uses for the CPM, such as:

- Health & Safety Signs
- Engineering Labelling
- Electrical Marking
- Plant ID
- Asset Labelling
- Pipe Marking
- Logistics Labels

How does the CPM-100H work?

The CPM-100H combines thermal print and vinyl-cutting technology, together with our tried and tested software, to produce both multiple spot, or full colour outputs. So for example, you can design and print a multi-coloured label that can then be contour-cut to fit into a recess. Because the system handles individual shapes and sizes, there's no need to buy customised blank labels. For customers who need to label high-value, low quantity equipment in a professional manner, the CPM-100H is ideal.

With a print length of up to 1.5 metres at a time, you could print and cut more than a run of more than 100 product labels 50mm x 24mm in one go.

Included Software

Our innovative Microsoft Certified software enables you to incorporate sequential numbering, information from databases and even barcodes. With a comprehensive clip art gallery containing more than 3,700 symbols, all health and safety needs are taken care of. As well as the built-in symbols, you can easily introduce your own logos, diagrams and schematics.

You can cut hundreds of different shapes using the symbols in the gallery, or you can import any shape you require using wmf (Windows Metafile). The CPM-100H will also allow printing over your network.

Consumables

Our consumables have recyclable cardboard cores and ribbons are placed in refillable cartridges, making them both environmentally friendly and cost effective. We have a large range available from stock, and can also produce specialist made-to-order materials.

Create your own
product & prototype labels
wherever & whenever you need them

Polyester product label set:
55mm x 100mm. Cost: £0.49

Bespoke cut warranty VOID label:
50mm x 20mm. Cost: £0.13
